

HOW COLLOIDAL SILVER WORKS

Colloidal Silver is a **powerful antimicrobial** liquid containing silver ions **which helps destroy bacteria, fungi and viruses**. It is most commonly **used as a natural antibiotic** and to **promote healing or fight disease** in the body. It also has a **powerful positive effect on the immune system** when taken orally.

Extensive research* into the curative properties of silver conclude that **silvers works on a wide range of bacteria, without any known side effects or damage** to the cells of the body, and that **is safe to take with other products**.

Regarding the **innate ability of silver to control infection**, research shows that **all infection causing organisms** tested **were destroyed by the silver ions**, including some that were resistant to all known antibiotics....**no undesirable side effects** of the silver treatment were apparent.

The fact the **silver kills bacteria** is being rediscovered – something which has been known and applied for centuries.

The presence of colloidal silver near a virus, fungus, bacterium or any other single celled pathogen **works as a catalyst disabling its oxygen** metabolism enzyme – its chemical lung, so to speak. Within a few minutes **the pathogen suffocates and dies and is cleared out of the body by the immune system, lymphatic and elimination systems**.

When compared to pharmaceutical antibiotics, Colloidal Silver

- **Leaves beneficial tissue cell enzymes intact**
- **Has never been known to have resistant strains develop**
- **Is effective against more than 650 disease causing pathogens including viruses**, antibiotics are effective only against about 12 forms of bacteria and fungi but never viruses
- Is considered to be **'a second immune system'**
- **Is absolutely safe for humans** and all multi celled living matter

Some conditions against which Colloidal Silver has proven successful

Acne – allergies-arthritis-athletes foot-bad breath-body odour-burns-candida-chronic fatigue- cold and flu-conjunctivitis-cystitis-dandruff-dermatitis-diarrhoea-dysentery-eczema-hay fever-herpes-malaria-parasitic infections both viral and fungal-psoriasis-rheumatism-ringworm-specific conditions of the eyes, ears, mouth and throat-shingles-sinusitis-skin cancer-staph infections-strep infections-toxaemia-travellers belly-ulcers (skin and stomach)-all forms of viruses-warts-yeast infections.

Keep Colloidal Silver in a cool place out of all direct sunlight and away from electro-magnetic fields.

DO NOT REFRIGERATE

Nothing stated here should be considered as medical advice for dealing with a given problem. Consult your health care professional for individual guidance for specific health problems. This information on colloidal silver is simply a collection of information in the public domain, and is strictly for information and educational use only. Information conveyed herein is based on pharmacological and other records both ancient and modern. No claims whatsoever can be made as to the specific benefits accruing from the use of colloidal silver.

HOW TO TAKE COLLOIDAL SILVER

Colloidal Silver can be taken orally and it can be sprayed or applied topically. When using Colloidal Silver, drink at least 1 litre of water daily to aid the flushing process.

ORAL DOSES

To maintain good health and assist in preventing viral and bacterial infections

Adults: 15-20mls daily

Children under twelve: 5-10mls daily

To treat illness and infection

Adults: 25-30mls hourly

Children under twelve: 10-15mls hourly

These doses can be taken more frequently if required. At all times, colloidal silver doses are best held under the tongue for 30-60 seconds before swallowing.

Colloidal Silver is also effective as a gargle.

Used in this way Colloidal Silver can help impede and heal

Bad breath and tooth decay-chronic fatigue-colds and flu- diarrhoea-dystentery-food poisoning-gastric flu-indigestion-mouth and throat infections-travellers belly-ulcers-viral and bacterial infections. Good for soaking dentures.

COLLOIDAL SILVER IS AN EXCELLENT WATER PURIFIER

Add 50mls/litre, shake well and wait ten minutes before drinking.

COLLOIDAL SILVER SPRAY

Colloidal Silver Spray could be the most useful health enhancement product you own – and you can take and use it everywhere!

Body Spray: Spray directly on affected areas hourly or as often as required until condition is healed. A dressing material such as gauze or wadding can be soaked in colloidal silver and kept in place with water proof tape or plastic wrap. Adhesive dressing strips can also be used. Change at least three times daily.

Colloidal Silver can be used in these ways on:

Abrasions-acne-allergies-athletes foot-body odour-burns-cuts-conjunctivitis-dermatitis-eczema-haemorrhoids-insect bites-nappy rash-parasitic infections- rashes- razor nicks-sunburn-warts-wounds

Around and in the home: Spray on rubbish to prevent odours-spray benches and food preparation surfaces- spray fridge, freezer and food storage bin interiors-spray on top of contents of opened jams and condiments and inside lids before replacing-spray plant foliage to stop fungi, moulds, rot and most plant diseases-spray inside shoes and watch bands-showers, baths, shavers, tooth brushes-spray telephone mouth pieces and headphones – spray toilet seats and bowls-kill persistent odours.

Nasal Spray: for irrigation of nasal problems, sinusitis, cold etc, spray and sniff up each nostril 6 or more times daily

To prevent infection by airborne pathogens, spray and sniff every one to three hours when on airplanes, in air conditioned offices and work places, and in crowded public places. A concentration of silver ions between 8 and 15ppm.mg/L is recommended for nasal use.

COLLOIDAL SILVER – Frequently Asked Questions

What is Colloidal Silver?

Colloidal Silver is simply particles of pure silver suspended in pure water.

How does Colloidal Silver Work?

When a particle of silver comes in contact with living bacteria, viruses and fungi, it inhibits their ability to reproduce. Once the life span of these pathogens is over, that's it. Existing disease heals and the growth of new disease is prevented.

Why is Colloidal Silver referred to as a natural antibiotic?

Colloidal Silver works on a wide range of bacteria, including some that are resistant to antibiotics. In fact, research has shown that colloidal silver is effective against more than 650 disease causing pathogens including viruses. Antibiotics are effective against about 12 forms of bacteria and fungi but NEVER against viruses. Colloidal silver has never been shown to have resistant strains develop.

Is Colloidal Silver safe to use?

Yes! Research shows that colloidal silver has no known side effects and is safe to take with other products.

What conditions can Colloidal Silver be used to treat?

Colloidal Silver has been demonstrated to be effective in the treatment of:

Acne – allergies-arthritis-athletes foot-bad breath-body odour-burns-candida-chronic fatigue- cold and flu-conjunctivitis-cystitis-dandruff-dermatitis-diarrhoea-dysentery-eczema-hay fever-herpes-malaria-parasitic infections both viral and fungal-psoriasis-rheumatism-ringworm-specific conditions of the eyes, ears, mouth and throat-shingles-sinusitis-skin cancer-staph infections-strep infections-toxaemia-travellers belly-ulcers (skin and stomach)-all forms of viruses-warts-yeast infections.

How should I take Colloidal Silver?

You can drink Colloidal Silver and you can spray it. When drinking, it is important that doses are held under the tongue for 30-60 seconds and swished around the mouth before swallowing. It is also effective as a gargle. Colloidal Silver sprays can be used directly on infections and wounds.

How do I know the correct dose?

ORAL DOSES

To maintain good health and assist in preventing viral and bacterial infections:

Adults: 15-20ml daily

Children under twelve: 5-10mls daily

To treat illness and infection:

Adults: 25-30mls hourly

Children under twelve: 10-15mls hourly

These doses can be taken more frequently if required.

BODY SPRAY DOSES

Spray directly on affected areas hourly until condition is healed. A dressing material such as gauze or wadding can be soaked in colloidal silver and kept in place with water proof taping or plastic wrap. Adhesive dressing strips can also be used. Change daily.

NASAL SPRAY DOSES

For irrigation of nasal problems, sinusitis, cold etc spray and sniff up each nostril every hour or as often as required.

To prevent infection by airborne pathogens, spray and sniff every one to three hours when on airplanes, in air conditioned offices and work places, and in crowded public places.
